

Electronics & Software expertise - When you need it

Do you have a business critical technology project but lack the resource or skills to make it happen?

Use expert resource from Coriel

- Local flexible highly experienced expertise
- Bridge skill gaps and address resource peaks
- Only pay for resource when you need it
- Free your resource to add your core value

In a cash conscious business environment it's vital to control costs whilst still meeting business commitments. Using our resources is a low risk way to achieve this.

Our engineers work in partnership with clients to achieve results fast and cost effectively.

We can supply professional hardware and software engineering resource to you. We can also take on outsourced work packages in accordance with your business needs

What sets Coriel apart?

- Highly experienced & professional
- Skilled problem solvers
- Hardware & software design
- Ethernet & telecoms R&D specialists
- Team working & partnering
- Excellent communications skills

Proven Track Record

The Coriel team are experts in electronics and computer systems with many years of experience at the cutting edge of the technology industry. We pride ourselves on our professionalism, attention to detail, and our ability to communicate at all levels.

Flexible Terms

We can work on an hourly or fixed fee basis. Our company is registered in England, is VAT registered and carries professional indemnity insurance.
